The numbered disc is cut from a sheet of cardboard (not included in the Outfit) and is bolted to a 5/16" x 2 1/2" flanged plate. The vertical rod, about which the pointer is free to spin, is passed through the plate and clamped in position by two Spring Clips.

A Selection of Interesting Meccano Models

KEEP ADDING TO YOUR OUTFIT

The more Meccano parts you have the bigger and better the models you are able to build. Keen and enthusiastic model-builders keep adding to their Outfits, until they are able to build all the wonderful models shown in the Meccano Manuals of Instructions.

The model-building possibilities of the Meccano System are limitless. All the fine models illustrated on this page are examples of the types you will be able to build as your Outfit develops and its scope increases.

You can purchase separate Meccano parts as you require them, or, if you prefer, you can purchase Accessory Outfits that connect all the main Outfits with the exception of the 000 and 00.

Ask your dealer for a complete illustrated price list.

All these Models can be built with Meccano Outfit No. 000

To New Meccano Boys

The Meccano system is composed of over two hundred and fifty different parts, mostly made of steel or brass, each one of which has a definite mechanical purpose. These parts combine to form a complete miniature engineering system with which practically any mechanical movement may be reproduced in model form.

There is no limit to the number of models that can be built with Meccano—Cranes, Clocks, Motor Cars, Ship-Coalers, Machine Tools, Locomotives—in fact everything that interests boys. The most wonderful feature about the system is that it is *real engineering* in miniature; it is fascinating and delightful, and it gives you a satisfaction beyond anything that you have ever previously experienced.

The "Meccano Magazine"

If you want to obtain the maximum amount of fun from the Meccano hobby you must read the "Meccano Magazine," the Meccano boy's own newspaper. This splendid Magazine contains fine articles on all subjects of interest to boys, and includes correspondence columns in which the Editor replies to his readers' enquiries.

The "M.M." is published on the first of each month and may be ordered from any Meccano dealer, newsagent or bookstall.
